ATI-INTERCO announces launch of a new website for 2mm pitch Harsh Environment Interconnect systems

Courcouronnes, France (April 2016) – ATI-INTERCO, a leading manufacturer and supplier of 2mm pitch harsh environment connectors and interconnect systems is launching a new website with an easy-to-use “Product finder” feature.

“The market for 2mm pitch Board-to-Board and Wire-to-Board applications is continuing to grow with a very wide range of options for contact type, number of pins, contact plating, board fixtures, locking systems etc.

Consequently, it is not always easy for a design-engineer to select and combine the correct product features in order to get the interconnect product that fits the design requirements.

“We want to help both existing and potential customers in quickly accessing the information they need and in selecting the right connector solution”, says Karim Louanchi, GM of ATI-INTERCO.

All products included in this easy-to-use product selector will be shipped within 4 weeks from order receipt.

2mm harsh environment interconnect systems are widely used in the Military, Avionics/Space, Heavy Industry, Oil & Gas and Transportation (Rail) market segments. Those interconnect products need to comply with harsh specifications around robustness (PPS material used), humidity absorption, radiation resistance, vibration, shock severity and an extended operating temperature range (up to 260°C).

For additional information on ATI-INTERCO’s 2mm Harsh Environment Product selector please visit: www.ati-interco.fr/en/
